

Four tyres. Made by Michelin. For cars and the people who drive them.

**ZX.** The squat, low profile radial braced with cords of supple steel for superb road holding, controlled braking, and increased mileage. Built for cars capable of up to 113 mph.

**XAS.** The asymmetric radial. For maximum performance, intensely sensitive cornering and braking control and terrific wearing stamina at all speeds on cars capable of up to 130 mph.

**Xm+s.** The winter mud, snow and 'rough stuff' radial. The action, all weather tyre for sure positive grip in the worst conditions.

**300B.** The long life crossply. For a smoother, quieter ride, grip in the wet and real economy motoring.

For a free colour brochure about Michelin car tyres – the ZX, XAS, Xm+s radials and the 300B crossply – write to: Michelin Technical Information, 160 Brompton Road, London, S.W.3.
